## Personal Profile

Junior Frontend Developer with hands-on experience building responsive, accessible, and user-centred web applications using HTML, CSS, JavaScript, and React.

Skilled in developing inclusive interfaces following modern web standards, with an understanding of accessibility principles (WCAG) and progressive enhancement. Experienced in integrating frontend applications with REST APIs and working across the full development lifecycle, including prototyping, testing, and iterative improvements.

I bring strong transferable skills from a fast-paced healthcare environment, including teamwork, communication, and attention to detail. I am motivated to contribute to user-centred public sector digital services and continue developing within a collaborative, multidisciplinary team.

## Technical Skills

### Languages & Technologies:

HTML5, CSS3, JavaScript (ES6+)

### Frameworks & Libraries:

React, Redux

### Tools & Platforms:

Git, GitHub, VS Code, Node.js, Express.js, NPM

### Databases:

MongoDB (basic CRUD operations, backend integration)

### Development Skills:

Responsive design (mobile-first, Flexbox, Grid, Tailwind CSS)

REST API integration

Authentication (login/signup systems)

Basic full-stack development

Accessibility (semantic HTML, ARIA basics, WCAG awareness)

Progressive enhancement (graceful degradation, core functionality first)

Debugging and bug fixing.

## Projects

## Quiz Application (Full-Stack)

GitHub: <https://quiz4all-ygm1.onrender.com/>

- Developed a full-stack quiz platform with user authentication and score tracking
  - Built REST API integration using Node.js and Express
  - Implemented MongoDB for storing user data and quiz results
  - Designed a responsive interface to ensure usability across devices
  - Improved user experience by providing instant feedback (pass/fail results)
  - Built accessible UI components using semantic HTML and responsive design principles
- Applied progressive enhancement by ensuring core functionality works across devices and browsers
  - Tested and debugged application features, resolving usability and functionality issues

## E-commerce Platform (Coffee Shop)

GitHub: <https://spunkyboy.github.io/spunkyCafe/index.html>

- Developed a shopping cart system with product data persistence using LocalStorage
- Built dynamic product pages using JavaScript and API calls
- Applied responsive design principles for mobile and desktop users
- Structured code for scalability and maintainability
- Improved usability by structuring navigation and layout with user experience in mind
- Debugged and refined features based on testing and user interaction
- 

## Portfolio Website

GitHub: [https://spunkyboy.github.io/frank\\_osei/](https://spunkyboy.github.io/frank_osei/)

- Designed and deployed a personal portfolio to showcase projects and skills
- Focused on clean UI design and responsive layouts
- Demonstrated ability to structure and present technical work effectively

## Work Experience

### Ward Environmental Support

## Leeds Teaching Hospitals NHS Trust | 2019 – Present

- Worked within structured processes, aligning with standards and compliance requirements (similar to regulated digital environments)
  - Worked in a fast-paced healthcare environment, managing multiple priorities under pressure
  - Collaborated with multidisciplinary teams, strengthening communication and teamwork skills
  - Maintained high attention to detail while following strict protocols and compliance standards
  - Supported implementation of new processes, demonstrating adaptability and problem-solving
  - Communicated effectively with staff and patients, building strong interpersonal skills

## Education & Certifications

### **Certificate in Front-End Development** – Learning People (2024)

- HTML, CSS, JavaScript, React, Redux, Responsive Design

### **GCSEs (or equivalent)** – Blackburn Gould & Associate Ltd (2023)

- Maths (C), English (C)
