Junior Frontend Developer with a foundation in HTML, CSS, JavaScript, and React, supported by hands-on projects and professional training. Experienced in building responsive, user-friendly applications with database integration (MongoDB) and version control. Previous work in hospital hospitality has developed excellent communication, problem-solving, and teamwork skills, making me adaptable and effective in collaborative environments. Seeking a Junior Frontend Developer role to contribute technical expertise and grow in a supportive development team.

Hard Skills

- **Languages & Markup:** HTML5, CSS3, JavaScript (ES6+)
- **Frameworks & Libraries:** React, Redux
- **Version Control:** Git & GitHub
- **Databases:** MongoDB (basic CRUD, integration with backend)
- **Responsive Design:** Mobile-first, Flexbox, Grid, Tailwind CSS, SCSS.
- **Tools:** VS Code, Node.js, Express.js, NPM
- **Other:** REST APIs, Authentication (login/signup).
- Accessibility (WCAG basics)
- Cross-browser compatibility
- Photoshop

Soft Skills

- **Strong problem-solving ability**, demonstrated through building coding projects and handling real-world issues.
- **Excellent communication skills**, developed through customer service and collaborative project work.
- **Adaptability and quick learner**, proven through career change into tech and mastering new technologies.
- **Teamwork and collaboration**, gained from group projects and cross-functional work experience.

Certifications / Qualifications

- **Certificate in Front-End Development** – Learning People, 2024
 - Topics: HTML, CSS, JavaScript, Web Design Principles, Responsive Layouts, React and Redux
 - Developed user interface design and responsive web development skills, directly aligning with current career goals in software development.
- **GCSEs (or equivalent)** – Blackburn Gould & Associate Ltd, 2023
 - Maths – Grade C
 - English – Grade C
- **CIW Advanced HTML & CSS3 Specialist** 2020

Projects

- 1- **Quiz App** – Built a full-stack quiz application with login/signup, MongoDB integration, and pass/fail calculation.

Tech stack: HTML & CSS, Fetch API, Node.js, Express, MongoDB.
