Personal Summary

Junior Frontend Developer with a foundation in HTML, CSS, JavaScript, and React, supported by hands-on projects and professional training. Experienced in building responsive, user-friendly applications with database integration (MongoDB) and version control. Previous work in hospital hospitality has developed excellent communication, problem-solving, and teamwork skills, making me adaptable and effective in collaborative environments. Seeking a Junior Frontend Developer role to contribute technical expertise and grow in a supportive development team.

Hard Skills

- 1 Languages & Markup: HTML5, CSS3, JavaScript (ES6+)
- 2 Frameworks & Libraries: React, Redux
- 3 Version Control: Git & GitHub
- 4 Databases: MongoDB (basic CRUD, integration with backend)
- 5 Responsive Design: Mobile-first, Flexbox, Grid, Tailwind CSS
- 6 Tools: VS Code, Node.js, Express.js, NPM
- 7 Other: REST APIs, Authentication (login/signup).

Soft Skills

- 1 Strong problem-solving ability, demonstrated through building coding projects and handling real-world issues.
- 2 Excellent communication skills, developed through customer service and collaborative project work.
- 3 Adaptability and quick learner, proven through career change into tech and mastering new technologies.
- 4 Teamwork and collaboration, gained from group projects and cross-functional work experience.

Certifications / Qualifications

1. Certificate in Front-End Development – Learning People, 2024
Topics: HTML, CSS, JavaScript, Web Design Principles,

Responsive Layouts, React and Redux

2. GCSEs (or equivalent) – Blackburn Gould & Associate Ltd, 2023
Maths – Grade C
English – Grade C

Projects

1. Quiz App – Built a full-stack quiz application with login/signup, MongoDB integration, and pass/fail calculation.

Tech stack: HTML & CSS, Fetch API, Node.js, Express, MongoDB.

Work Experience

Ward Environmental Support – Leeds Teaching Hospital, Leeds.
2019 – Present.

Managed multiple tasks in a fast-paced, high-pressure environment, demonstrating organisational and time-management skills transferable to project delivery.

Collaborated with diverse teams to implement new procedures and systems, showing adaptability, teamwork, and process improvement skills.

Maintained meticulous attention to detail while following strict protocols, ensuring accuracy and compliance in all tasks.

Communicated effectively with patients and staff, developing interpersonal and stakeholder management skills applicable to client-facing roles.

Adapted quickly to changing workflows and technology, proving agility in learning new tools and systems.

Education & Certifications

1. Certificate in Front-End Development – Learning People (2024)

Gained hands-on experience in HTML, CSS, JavaScript, and React, building practical projects that demonstrate frontend application development and problem-solving skills.

Developed user interface design and responsive web development skills, directly aligning with current career goals in software development.

2. GCSEs (or equivalent) – Blackburn Gould & Associate Ltd (2023)

Gained foundation for analytical thinking and structured learning, supporting further technical studies and professional development.
